PROFESSIONAL OVERVIEW

Aspiring **Frontend Web Developer** with a strong foundation in **HTML, CSS, Bootstrap, JavaScript and Firebase**. Passionate about crafting responsive, user-friendly, and visually appealing web applications. Skilled in front-end development with a keen eye for detail and a commitment to clean, efficient code. Eager to learn and grow in a dynamic development environment while contributing innovative solutions.

EXPERIENCE

Freelance Web Developer *(Self-Employed | 2024- Present)*

Hospital Website Development
- Designed and developed a fully responsive website for Jalal Heart and Medical Center, enhancing online patient engagement and accessibility.
- Implemented features such as service overviews, contact information, and emergency service details, providing comprehensive information to visitors.
- Managed end-to-end deployment, including domain registration and hosting setup, ensuring a secure and reliable online presence.

🔗 **Live Website:** https://jalalheartcenter.online/

School Website Development
- Created a modern, user-friendly website for Kingsley American School, facilitating streamlined student admissions and academic updates.
- Developed structured content layouts, including sections for academic programs, faculty information, and extracurricular activities, making information easily accessible.
- Optimized website performance, ensuring fast load times and a seamless user experience across devices.

EDUCATION

Bachelors in Software Engineering (Undergraduate)
Sir Syed University, Karachi
2023 - 2027

Intermediate in Computer Science
P.E.C.H.S Govt. College, 2021-2023

SKILLS

- HTML
- CSS
- Bootstrap
- JavaScript
- Firebase
- Version Control (Git, GitHub)
- Web Hosting & Deployment

PROJECTS

Basic Calculator *(HTML, CSS, JavaScript)*

Developed a simple yet functional calculator with a clean UI, supporting basic arithmetic operations. Ensured a responsive design, making it accessible across different screen sizes.

🔗 **Live Demo:** https://basic-calculator-kappa-five.vercel.app/

Weather Web App (JavaScript, API Fetching)

Built a weather forecasting application that fetches real-time weather data from an external API. Displays temperature, humidity, and weather conditions based on user input, with a modern, user-friendly interface.

🔗 **Live Demo:** https://weather-web-phi-one.vercel.app/

Currency Converter (JavaScript, API Fetching)

Created a real-time currency converter that fetches live exchange rates from an API. Users can select different currencies and instantly get the converted amount, improving financial calculations.

🔗 **Live Demo:** https://currency-convertor-eta-one.vercel.app/

Guess a Number Game (JavaScript, DOM Manipulation)

Designed an interactive number guessing game, where users try to guess a randomly generated number. Features real-time feedback and an engaging UI to enhance the gaming experience.

🔗 **Live Demo:** https://guessing-number-game-theta.vercel.app/

Firebase Authentication Project

Developed a Firebase-integrated web application with authentication functionalities such as login, signup, and secure user management.

🔗 **Live Demo:** https://firebase-psi.vercel.app/
